ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: DUAL FUNCTION HANDLEBAR MOUNTED ACTUATOR

(57) Abstract: A dual function handlebar mounted actuator (10) including means (32) for operating a first function and means (34) for operating a second function, the first and second function operating means (32, 34) being arranged for activation by movement of a hand operated lever arrangement (16) and wherein the first and second functions operating means (32, 34) are linked so that a combined first and second function can be activated, wherein the first and second functions are a clutch and a brake function. In other embodiment an actuator arrangement including a lever movable between a first and a second position, a master cylinder having a piston, the lever moving towards the second position drives the piston from its initial position thereby increasing pressure in the master cylinder, and by releasing the lever the pressure within the master cylinder is arranged to return the piston towards its initial position, the piston being returned fully to the initial position upon movement of the lever to the first position.
